Community clinics:

- tax-exempt nonprofit organizations
- charges are based on patients' ability to pay

Free clinics:

- community clinics, where patients are not charged for services or medicines.

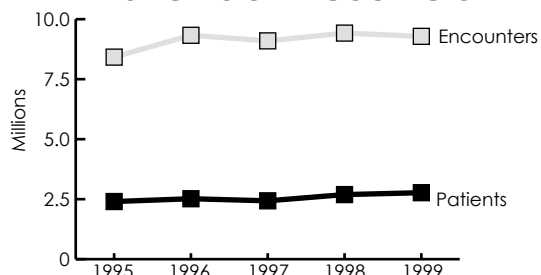

The Poverty Guidelines are issued by the Federal Department of Health and Human Services to estimate the number of persons/families in poverty for determining financial eligibility for Federal programs.

1997	739,491
1998	623,514
1999	577,342

Unduplicated patient: may have been seen more than once but is counted only once as a patient.

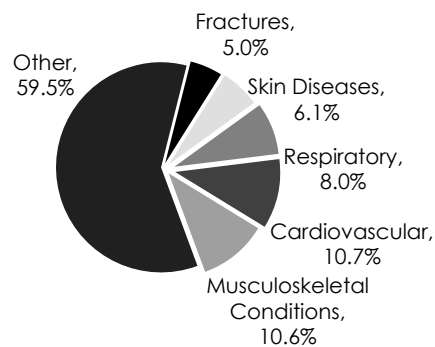

- There has been a significant decrease in reported home health patients in 1999.

Patients
1999

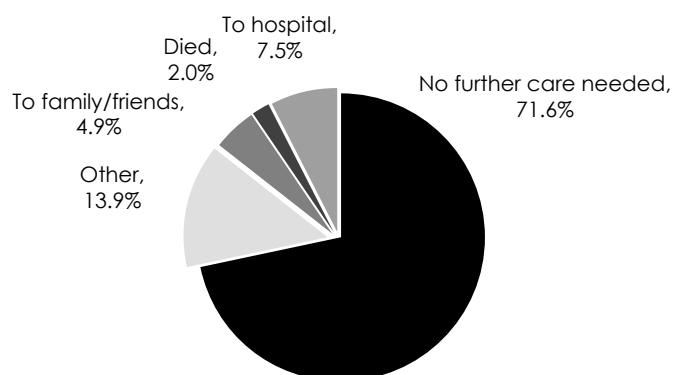

Age

Condition

- Over 68% of patients in home health agency care are over the age of 60.

Discharged To
1999

- Approximately 7% of patients are discharged from the hospital into home health agency care.

California Healthcare Resources

18

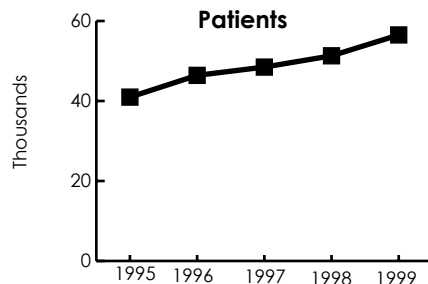

Hospice: palliative care to support a patient in the last phases of life due to the existence of a terminal disease.

- Over 84% of hospice patients are over the age of 60.

CLINICAL OVERVIEW

Types of Principal Diagnoses 1999

Types of Principal Procedures 1999

- Pregnancy and births account for 28.3% of discharges statewide.
- Circulatory, respiratory, & digestive systems account for the top three diagnostic categories, excluding pregnancy and births.

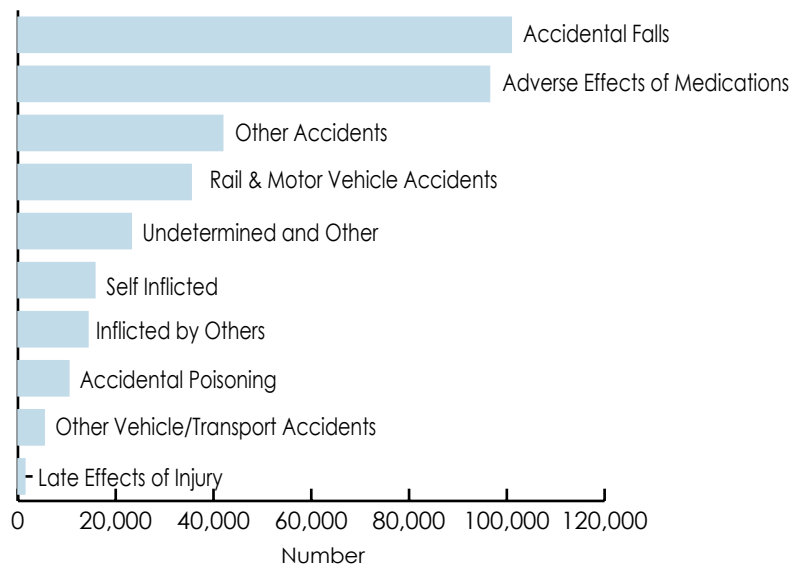

- Diagnostic/therapeutic procedures account for 23.7% of statewide inpatient principal procedures.
- Excluding obstetrical and diagnostic/therapeutic procedures, the top three procedure categories for hospital discharges statewide are digestive (13.0%), cardiovascular (11.9%), and musculoskeletal (9.4%).

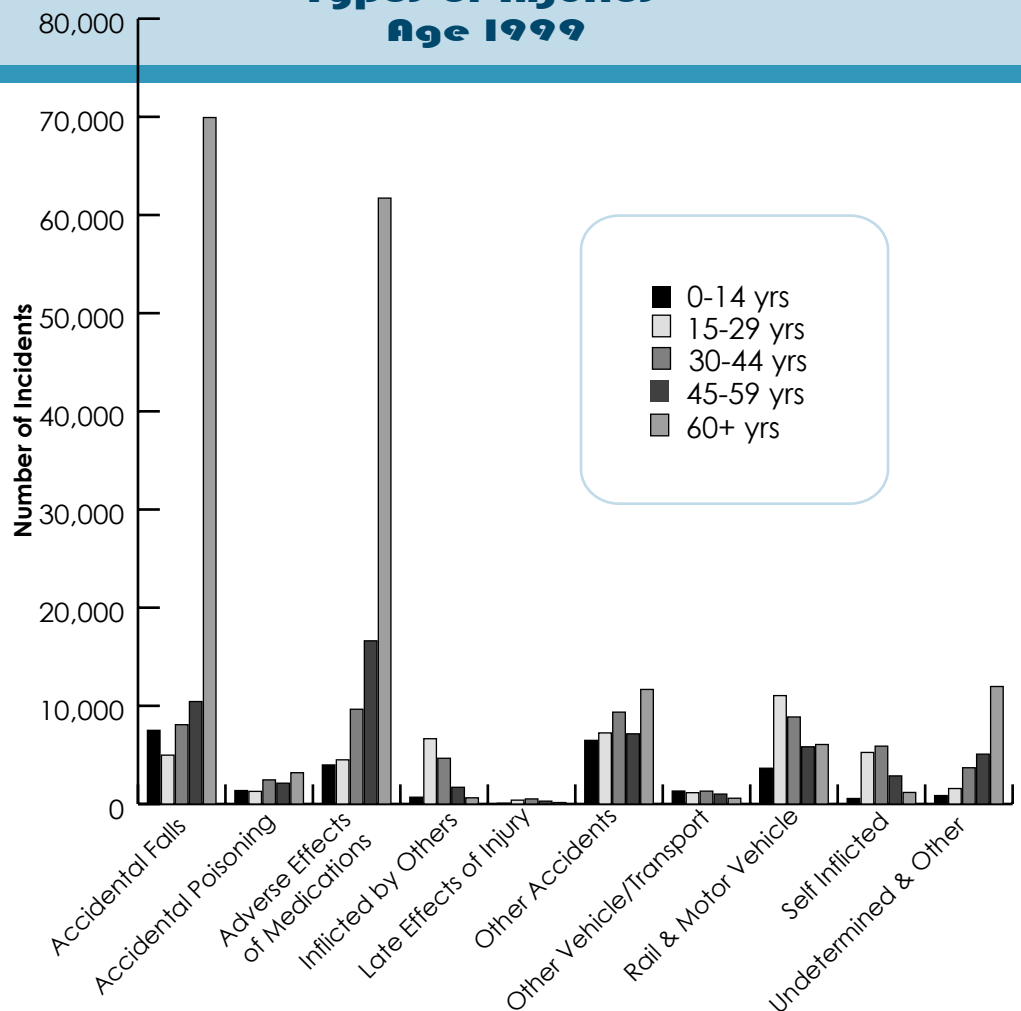

- Accidental falls, adverse effects of medications, and other accidents are the top three principal cause of injuries of California inpatients.

- Patients age 60 and over represent 69.3% of discharges for accidental falls and 64.0% of discharges for adverse effects of medications.

Selected Procedures

Cardiac Bypass

Mastectomy

Prostatectomy

Selected Injuries

Auto Injuries

Drug Poisonings

Gunshot Injuries

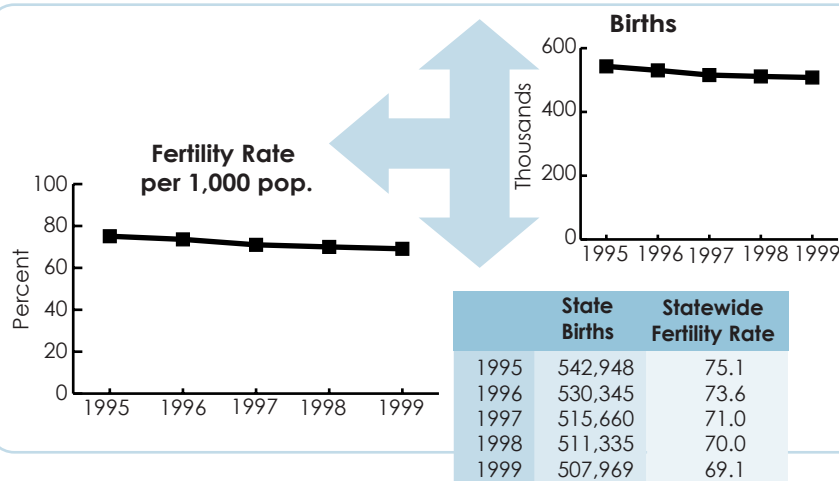

- Fertility rate is calculated by dividing the number of births by the population of females aged 15-44 years.

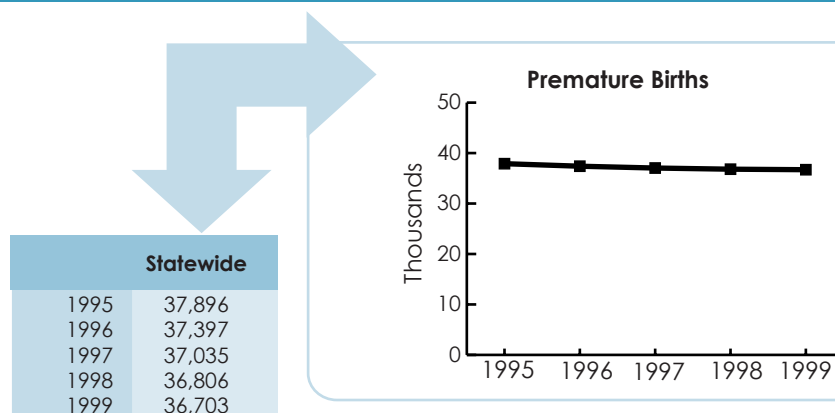

- 7.1% of all births to California residents were premature.
- Year 2010 National Health Objectives Goal: Cesarean section births to equal no more than 15.5% of total births.

BIRTHS & DELIVERIES

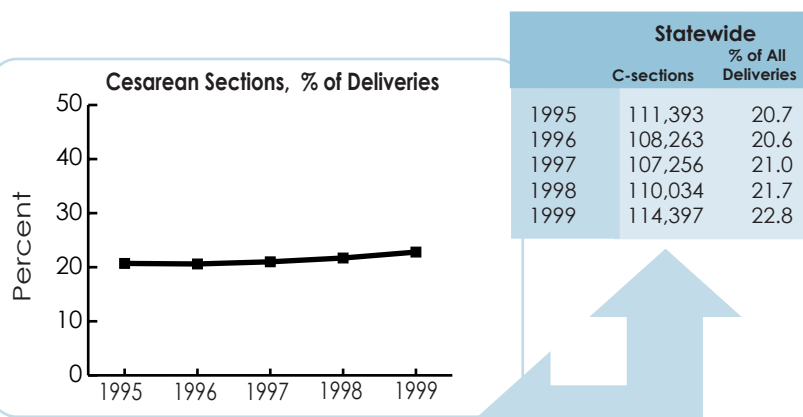

State Trends

Premature Births

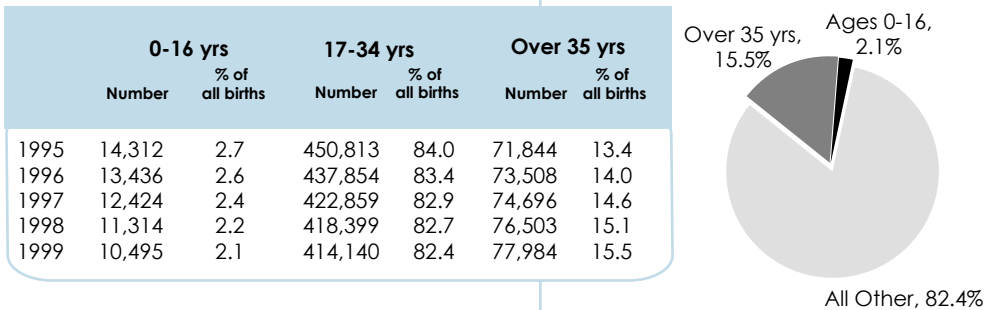

Cesarean Section Deliveries

State Trends

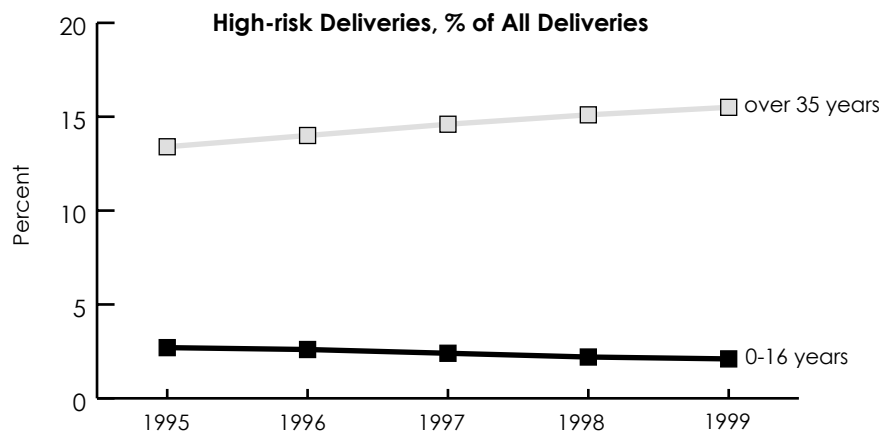

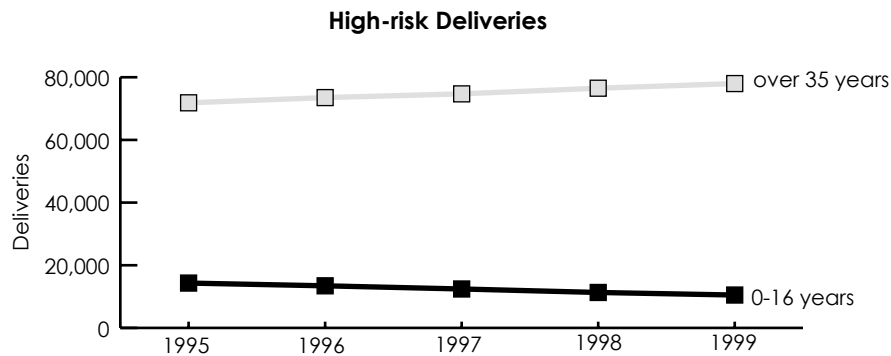

**All Deliveries:
Mother's Age at Delivery, 1999**

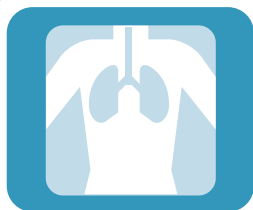

- Deliveries by females less than 16 years of age or greater than 35 years of age are considered "high risk."

High-risk Deliveries
